***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 29-33, drawn to monomers.

Group II, claim(s) 11-16, drawn to a method of making monomers.

Group III, claim(s) 17 and 18, drawn to a method of using monomers.

Group IV, claim(s) 19, 20, 26, 34, 35, and 37 drawn to polymers and a process of using the polymer.

Group V, claim(s) 23-25, drawn to a reaction mixture.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature, monomers according to instant claim 1, is known in the art. See, for example, WO 93021237 (page 5).

3. It is noted that while Group IV contains inventions of different statutory categories (product and process) they are grouped together as they are not deemed patentably distinct from each other.

Art Unit: 1796

4. A lack of unity a posteriori can be established if the common technical feature does not define a contribution over the prior art (see MPEP 1850). In this case, because the common technical feature is known in the art, the common technical feature does not amount to a special technical feature, and therefore there is a lack of unity between the cited groups of inventions.

5. A telephone call was made to James Napoli on 29 March 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1796

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
